Physiological Measurement

A journal for sensors, instrumentation and systems in physiology and medicine.
Physiological Measurement covers the quantitative assessment and visualization of physiological structure and function in clinical research and practice, with emphasis on the development of new methods of measurement and their validation, including:

- Measurement in applied physiology
- Human biology and clinical medicine
- Instrumentation and methods of data analysis
- Clinical engineering
- Patient monitoring
- Life support systems
- Flow and pressure measurement

Honorary Editor
S J Meldrum, Norfolk and Norwich Health Care NHS Trust, UK

Editorial Board
R Bayford, Middlesex University, London, UK
A H Beddoe, Queen Elizabeth Hospital, Birmingham, UK
I R Chambers, Newcastle General Hospital, UK
J Crowe, University of Nottingham, UK
D T Delpy, University College London, UK
C E W Hahn, Radcliffe Infirmary, Oxford, UK
N D Harris, Royal Hallamshire Hospital, Sheffield, UK
N Lovell, University of New South Wales, Sydney, Australia
R G Mark, Harvard/MIT, Cambridge, MA, USA
M R Neuman, University of Memphis and University of Tennessee, Memphis, USA
J R Stradling, Churchill Hospital, Oxford, UK
M Tamura, Hokkaido University, Sapporo, Japan
T Togawa, Tokyo Medical and Dental University, Japan
M A Tooley, University of Bristol, UK
P Vadgama, Queen Mary College, London, UK
J Webster, University of Wisconsin, Madison, USA

A Selection of Recent Papers
- The measurement of impedance to assess myocardial contractility and rhythm stability  W Arthur, D Edgar and G C Kaye (UK)
- A 3D electrical impedance tomography (EIT) system for breast cancer detection V Cherepenin, A Karpov, A Korjenevsky, V Kornienko, A Mazaletskaya and D Meister (Russia)
- A method for bio-electrical impedance analysis based on a step-voltage response  C E B Neves and M N Souza (Brazil)
- The application of electrical impedance tomography to reduce systematic errors in the EEG inverse problem - a simulation study  S Gonçalves, J C de Munck, R M Heethaar, F H Lopes da Silva and B W van Dijk (The Netherlands)
- An improved data acquisition method for electrical impedance tomography  R P Patterson, T E Kerner, A Hartov, K S Osterman, C DeLorenzo and K D Paulsen (USA)
- Cardiopulmonary monitoring at home: the CHIME monitor  M R Neuman et al. (USA)
Visibility

*Physiological Measurement* is available both in print and electronically via the World Wide Web. Because online journal access is available to institutional subscribers at no additional cost, the level of exposure is genuinely global and increasing all the time. Electronic dissemination includes an 11-year online archive and HyperCite® linking between references and abstracts of cited papers.

The chart below shows the number of article downloads during a 12-month period to March 2001:

**Author Care**

*Physiological Measurement* authors benefit from a wide range of practical support services, some of which are described below:

**Electronic submissions** – *Physiological Measurement* now operates a full Electronic Submissions Service which allows authors to send both their initial submissions and revised versions in electronic format, with no need to provide paper copies. Further information, including format details, is available from [www.iop.org/Journals/pm/submit](http://www.iop.org/Journals/pm/submit).

**Notes for authors** – Details of our technical and procedural requirements are available electronically at [www.iop.org/Journals/nfa/index.html](http://www.iop.org/Journals/nfa/index.html).

**Online author enquiry service** – check the progress of your article quickly and conveniently via [www.iop.org/Journals/aes](http://www.iop.org/Journals/aes).

**Accelerated publication** – as standard. This means that articles are released onto the Web as soon as they are ready for publication.

**Page charges** – No page charges in our print journals.

**Colour figures** – No charge for colour illustrations in the electronic version.

**Multimedia** – Authors are encouraged to submit multimedia attachments to enhance the online versions of published research articles.

**Offprints** – 25 FREE offprints will be supplied of each published article. Further quantities may be purchased.

**11-year online archive** – available at no extra cost to institutional subscribers.

**For further information or to submit an article please contact:**

**Subscription Rates – Physiological Measurement**

Institutional rates include access to the electronic journal and an 11-year online archive (1991-2001 inclusive). Visit the journal’s homepage at [www.iop.org/Journals/pm](http://www.iop.org/Journals/pm) to request a free sample copy or to view Featured Articles.

**Volume 23** (4 issues in 2002) ISSN: 0967-3334 CODEN: PMEA3
