Know Metrologia - know Metrology

Metrologia is the Number 1 scientific journal for those interested in standards and calibrations.

The Editor and staff are situated at the prestigious Bureau International des Poids et Mesures, France, (guardian of the kilogram) and work tirelessly to ensure that only the **best and latest research** from the key national laboratories is published.

Subscribe to Metrologia

An annual subscription to Metrologia will enable researchers and staff at your institution to access all articles from 1997-2008 directly from their computer as well as all abstracts to articles going back to 1967.

That's over 1000 articles reporting the latest advances from around the world including special focus issues on atomic time-keeping, statistics, radionuclide metrology and many more – visit our website for a complete list at www.iop.org/journals/metrologia.

As well as full online access, you will also receive 6 printed copies of the journal each year, for your archives.

Your subscription

- 6 issues a year (starting with volume 45, 2008)
- Online access for all researchers to all articles from 1997-2008
- Online access for all researchers to all abstracts from 1965-1996.

Key Facts

Impact factor: 1.657
ISSN 0026-1394 (Print)
ISSN 1681-7575 (Online)
