LIQUIDS, SOFT MATTER AND BIOLOGICAL PHYSICS PAPERS

155101 Couette flow of a smectic A liquid crystal
A J Walker and I W Stewart

155102 Effect of the reservoir size on gas adsorption in inhomogeneous porous media
E Kierlik, J Pubsset and G Taupas

155103 Structural and optical properties of Tb-doped Na-Gd metaphosphate glasses and glass-ceramics
F Moretti, A Vedda, M Niki and K Nitsch

155104 Bending elasticity of saturated and monounsaturated phospholipid membranes studied by the neutron spin echo technique
Zheng Yi, Miháliu Nagao and Dobrin P Bossev

155105 Differences between pressure-induced densification of LiCl–H₂O glass and polyamorphic transition of H₂O
Yoshiharu Suzuki and Osamu Mishima

155106 The complex structure of liquid Cu₆Sn₅ alloy
Jingyu Qin, Hui Liu, Tingkun Gu and Xiufang Bian

PAPERS

NANOSTRUCTURES AND NANOELECTRONICS

155301 Ground state configurations and melting of two-dimensional non-uniformly charged classical clusters
D M Tomecka, G Kamieniarz, B Partoens and F M Peeters

155302 Temperature-dependent EXAFS analysis of embedded Pt nanocrystals
R Giulian, L L Araujo, P Kluth, D J Sproston, C S Schnoor, G J Foran and M C Ridgway

SOLID STRUCTURE AND LATTICE DYNAMICS

155401 Pressure-induced structural phase transitions on Na₀.₅CoO₂: a first principles study
Yanli Wang and Jun Ni

155402 Elastic scattering of 200 keV electrons in elemental solids: experimental observation of atomic-number-dependent oscillatory behavior
Konstantin Iakoubovskii and Kazutaka Mitsuishi

155403 Self-similar optical transmittance for a deterministic aperiodic multilayer structure
X I Saldana, E Lopez-Cruz and D A Contreras-Solorio

155404 Effective parameters for periodic photonic structures of resonant elements
C Tserkezis

ELECTRONIC STRUCTURE

155501 Spin transport properties of a quantum dot coupled to ferromagnetic leads with noncollinear magnetizations
Hao Zhang, Guang-Ming Zhang and Lu Yu

155502 Microscopic analysis of the crystal field strength and electron-vibrational interaction in cubic SrTiO₃ doped with Ce³⁺, Mn²⁺ and Fe²⁺ ions
M G Brik and N M Avram

155503 Electrical probing of the spin conductance of mesoscopic cavities
I Adagideli, J H Bardarson and Ph Jacquod

(Continued on inside back cover)
