# NANOTECHNOLOGY

## Patterning and nanofabrication

[www.iop.org/journals/nano](http://www.iop.org/journals/nano)

### SECTION EDITOR

"The patterning and nanofabrication section focuses on comprehensive

presentations of novel processing methods with nanometre resolution. Topics encompass a wide range of patterning and nanolithography techniques including the assembly of nanomaterials, electron and ion beam induced nanopatterning, modifications of nanomaterial properties and new applications based on these materials."

**Alfred Forchel**  
University of Würzburg

IMPACT FACTOR  
**3.037\***

\* As listed in ISI® 2006 Science Citation Index Journal citation reports

### Recent papers:

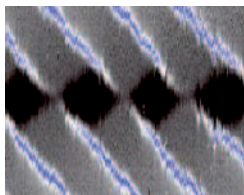

- Patterning of parallel nanobridge structures by reverse nanostencil lithography using an edge-patterned stencil **C W Park, O V Mena and J Brugger** 2007 *Nanotechnology* **18** 044002
- High performance short period superlattice digital alloy InSb/Ga<sub>x</sub>In<sub>1-x</sub>Sb laser emitting at 1.9 μm **M Müller, T Lehnhardt, K Rößner, M Hümmel, R Werner and A Forchel** 2007 *Nanotechnology* **18** 265302
- Nanopatterning of gold colloids for label-free biosensing **B Städler, H H Solak, S Frerker, K Bonroy, F Frederix, J Vörös and H M Grandin** 2007 *Nanotechnology* **18** 155306
- One-dimensional growth of MgO film on SrTiO<sub>3</sub>(100) **H-J Shin, S H Kim, H J Yang and Y Kuk** 2007 *Nanotechnology* **18** 175304

### Why publish your work in *Nanotechnology*?

- Free online access for 30 days to all published papers, giving your peers the chance to read and cite your article
- Extra promotion through the IOP Publishing website, [nanotechweb.org](http://nanotechweb.org) and through press releases
- High impact factor
- Average publication time of less than three months
- Papers are published online as soon as they are ready, in advance of the printed version
- Fully electronic publication process and easy online tracking of your paper

### Contact us

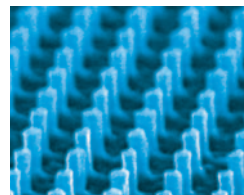

To submit your next paper please go to [www.iop.org/journals/authorsubs](http://www.iop.org/journals/authorsubs)  
For more information visit [www.iop.org/journals/nano](http://www.iop.org/journals/nano) or e-mail us at [nano@iop.org](mailto:nano@iop.org)

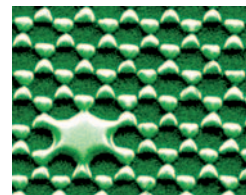

Assembling ferromagnetic single-electron transistors by atomic force microscopy  
**R S Liu et al** 2007 *Nanotechnology* **18** 055302

A nanofluidic emitter tip obtained by focused ion beam nanofabrication  
**S Arscott and D Troadec** 2005  
*Nanotechnology* **16** 2295–2302

Fabrication of a dense array of tall nanostructures over a large sample area with sidewall profile and tip sharpness control  
**C-H Choi and C-J Kim** 2006  
*Nanotechnology* **17** 5326–5333

Ordered arrays of silicon pillars with controlled height and aspect ratio  
**A Sinitski et al** 2007 *Nanotechnology* **18** 305307
