

Invitation to authors

# New Journal of Physics

The open-access journal for physics

*“New Journal of Physics is all about serving the whole physics community by publishing free-to-read, cutting-edge research of the highest quality”*

*Professor Eberhard Bodenschatz, Editor-in-Chief*

[www.njp.org](http://www.njp.org)

# New Journal of Physics

The open-access journal for physics

**622,447**

number of article  
downloads in 2006

**51,870**

average number of articles  
downloaded every month

**712**

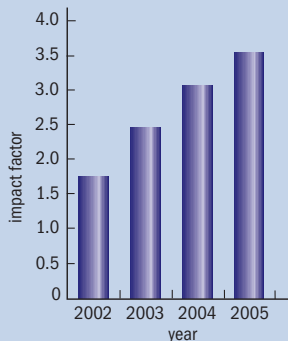

average downloads per article  
within one year of publication

**IMPACT FACTOR**

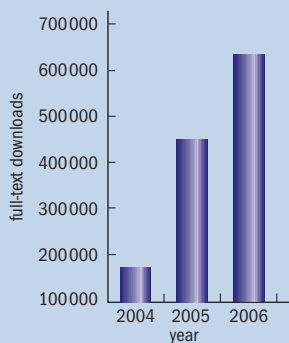

**3.754\***

\* As listed in ISI's 2006 Science Citation  
Index journal citation reports

## Impact factor

## Full-text downloads

**Cover image:** The analytical load efficiency of a laser guide and magnetic lens combined to transport a cold atomic cloud taken from the article "Transport of launched cold atoms with a laser guide and pulsed magnetic fields" by Matthew J Pritchard, Aidan S Arnold, Simon L Comish, David W Hallwood, Chris V S Pleasant and Ifan G Hughes 2006 *New J. Phys.* **8** 309

**New Journal of Physics (NJP) is an open-access, electronic-only journal publishing research across the whole of physics.**

## An invitation to submit

The Editorial Board would like to invite article submissions from researchers working at the forefront of areas extending across the whole of physics, as well as interdisciplinary studies where physics forms the central subject matter.

## What are the benefits of publishing with NJP?

By publishing with one of the fastest growing journals in physics you can take advantage of a number of benefits including:

### Rigorous peer-review

Maintaining high editorial standards is NJP's number one priority. Every submission is preliminarily assessed by the Editorial Board who also guide the formal peer-review process. 70% of regular submissions are rejected.

### Receive referee feedback in just over a month

We understand the importance of fast publication to you. NJP takes advantage of its online medium by providing competitive publication times while ensuring a strict refereeing procedure. On average you will receive a decision within 33 days of submitting your article.

### 700 downloads (on average) per paper within 12 months of publication

Open-access guarantees you outstandingly high article visibility. Every NJP paper is downloaded hundreds of times within weeks of publication and more than 50,000 articles are read each month.

### Free colour and multimedia

You can take advantage of NJP's online medium by including features that may not be possible in a print journal. This includes colour, movies, simulations and other supplementary features at no extra cost.

### Author-friendly copyright

NJP's copyright statement allows you and your institution to reproduce, distribute and communicate your published article to the public. Published articles may also be used for non-commercial purposes at your discretion.

### Long-term archiving

NJP is committed to ensuring long-term access to its entire content and is preserved via the LOCKSS system, a key archiving initiative that enables member libraries to collect, store and provide access to their own local copy of the journal. Digital archives of NJP are also stored locally at The British Library and Die Deutsch Bibliothek.

## Submit your paper

If you would like to submit a research article to NJP please go to IOP author services ([www.iop.org/EJ/authors](http://www.iop.org/EJ/authors)) to take advantage of our web submission features.

Any queries about NJP should be directed to the journal team at [njp@iop.org](mailto:njp@iop.org).

- Find out more about NJP at [www.njp.org](http://www.njp.org)
- Contact NJP at [njp@iop.org](mailto:njp@iop.org)

**NJP is completely free to read and is funded by article publication charges.**
