PERSPECTIVE
013001 Fractional order models of viscoelasticity as an alternative in the analysis of red blood cell (RBC) membrane mechanics
Damian Craiem and Richard Lenaghan Magin

COMMUNICATION
014001 A statistical approach to the estimation of mechanical unfolding parameters from the unfolding patterns of protein heteropolymers
G S Beddard and D J Brockwell

PAPERS
016001 Molecular electroporation and the transduction of oligoarginines
Kevin Cahill
016002 Thermostability in rubredoxin and its relationship to mechanical rigidity
A J Rader
016003 The simplicity of completion time distributions for common complex biochemical processes
Golan Bel, Brian Muszka and Ilya Nemenman
016004 Physico-chemical modelling of target depletion during hybridization on oligonucleotide microarrays
Conrad J Burden and Hans Binder
016005 Attenuation of transcriptional bursting in mRNA transport
Li-ping Xiong, Yu-qiang Ma and Lei-han Tang
016006 Modeling the role of covalent enzyme modification in Escherichia coli: nitrogen metabolism
Philip B Kidd and Ned S Wingreen
016007 The influence of variability on the optimal shape of an airway tree branching asymmetrically
Benjamin Maurer and Plamen Bokov
016008 Actin polymerization overshoots induced by plus-end capping
F J Brooks and A E Carlsson
016009 The folding of knotted proteins: insights from lattice simulations
Patricia F N Faisca, Ren D M Travasso, Tiago Charters, Ana Nunes and Mark Cieplak
016010 Kinetic models for autopoietic chemical systems: the role of fluctuations in a homeostatic regime
Fabio Mavelli and Pasquale Stano
016011 On the electrical intestine turbulence induced by temperature changes
A Gizzi, C Cherubini, S Migliorini, R Alloni, R Portuese and S Filippi
016012 Robust transport by multiple motors with nonlinear force–velocity relations and stochastic load sharing
Ambanish Kaurwar and Alexander Mogilner
016013 Resonant activation: a strategy against bacterial persistence
Yan Fu, Meng Zhu and Jiannhua Xing
016014 Computer simulations and modeling-assisted ToxR screening in deciphering 3D structures of transmembrane α-helical dimers: ephrin receptor A1
P E Volynsky, E A Mineva, M V Goncharuk, Ya S Ernolyuk, A S Arseniev and R G Efremov
016015 Local dynamics of gap-junction-coupled interneuron networks
Troy Lau, Gregory J Gage, Joshua D Bertke and Michal Zochowski
016016 A ‘random steady-state’ model for the pyruvate dehydrogenase and alpha-ketoglutarate dehydrogenase enzyme complexes
T S Nagji, G W Hatfield and E D Mjolsness
